Suspicious Activity from IP 104.222.32.91

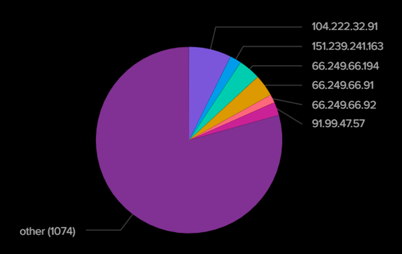
Multiple requests originating from IP address 104.222.32.91

Global Time Range

Last 24 hours

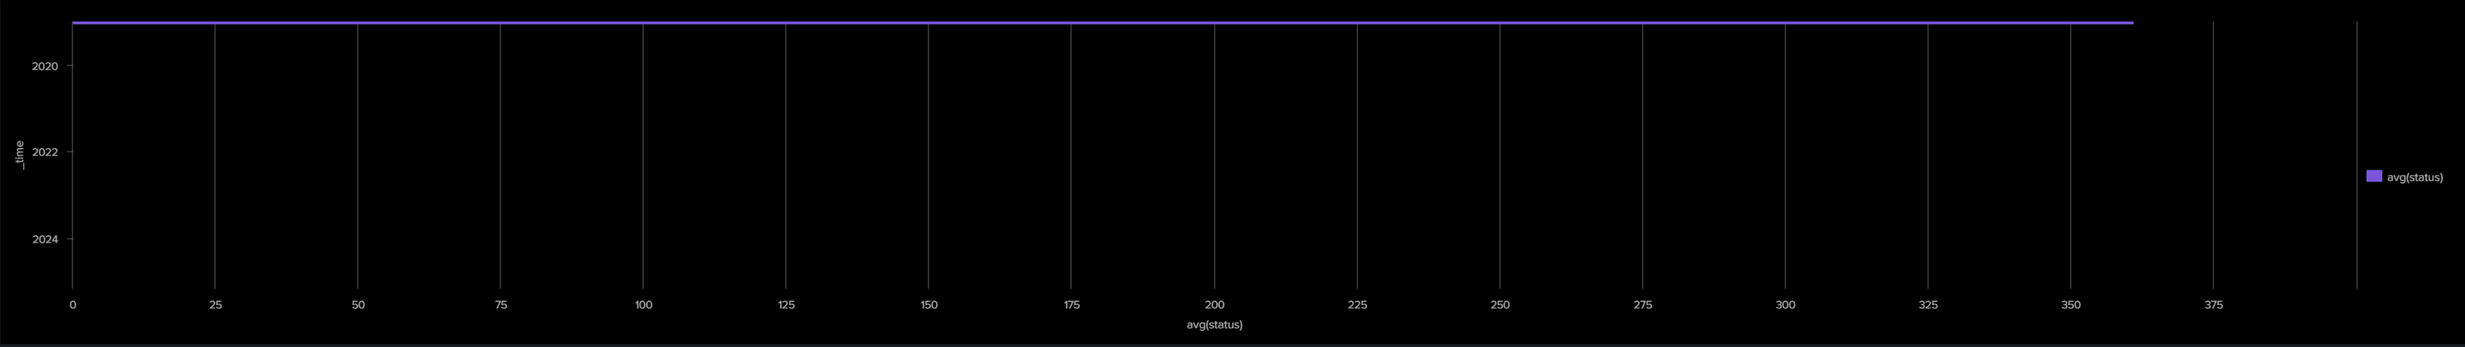
Suspicious IP Making Excessive Requests

This alert triggers when an IP address makes more than 100 requests within a short time frame. It helps to detect potential automated attacks, brute force attempts, or command and control (C2) activity using HTTP.



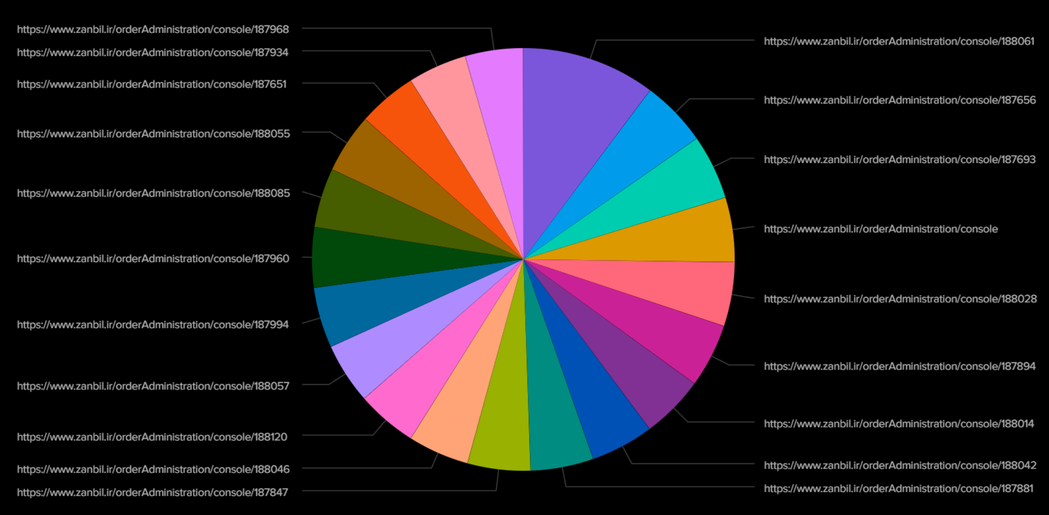
Average HTTP Status Code Over Time for IP 104.222.32.91

This barchart visualization displays the average HTTP status code over time for the client IP 104.222.32.91. By tracking the status codes, we can analyze server responses to requests made by this IP. A high average status code (e.g., 500) may indicate server errors or potential exploitation attempts, while a lower average (e.g., 200) suggests normal activity. Spikes in errors (500, 502) can reveal possible attack patterns, misconfigurations, or performance issues.



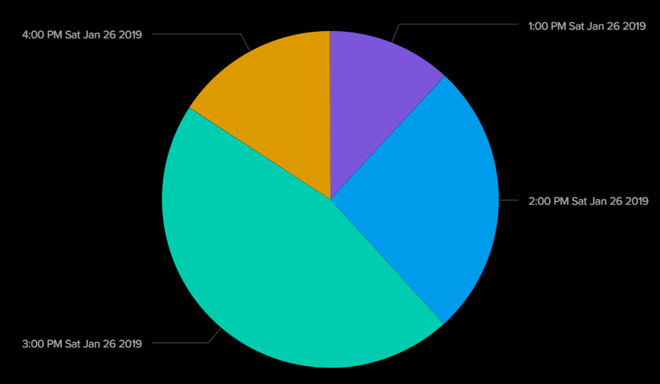
Top 20 Referers for IP 104.222.32.91

This visualization displays the top 20 referers (webpages that directed traffic) for the client IP 104.222.32.91. By analyzing the referer field, we can identify potential sources of traffic or malicious redirections leading to the server. If many request...



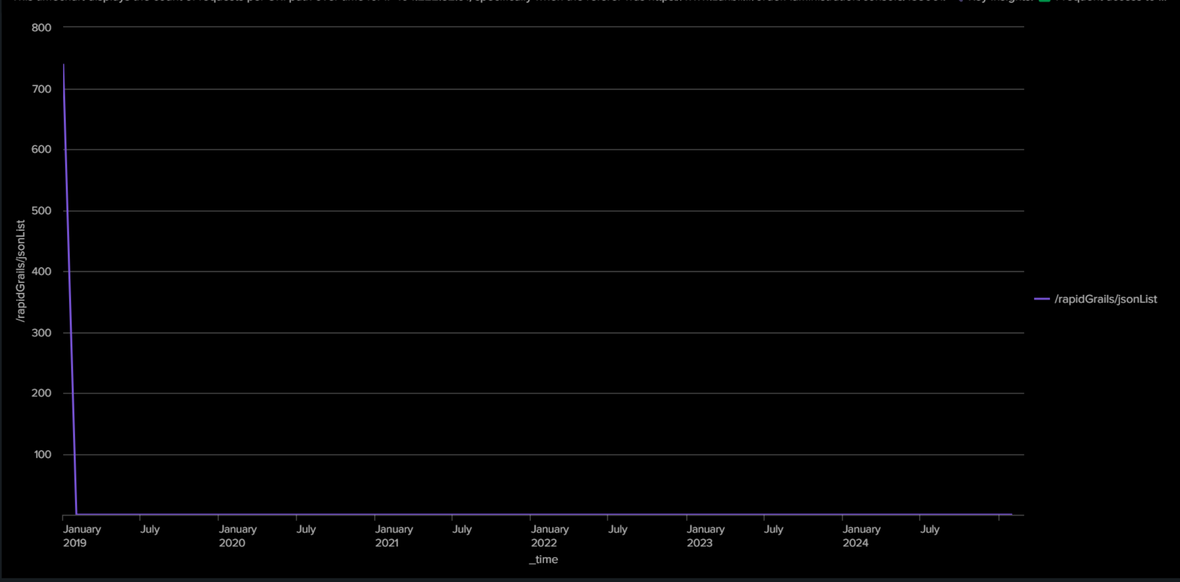
Hourly Request Trend from Referer (zanbil.ir/orderAdministration/console/188061) by IP 104.222.32.91

This timechart visualizes the hourly count of requests made by the client IP 104.222.32.91 where the referer is "https://www.zanbil.ir/orderAdministration/console/188061". By analyzing this graph,...



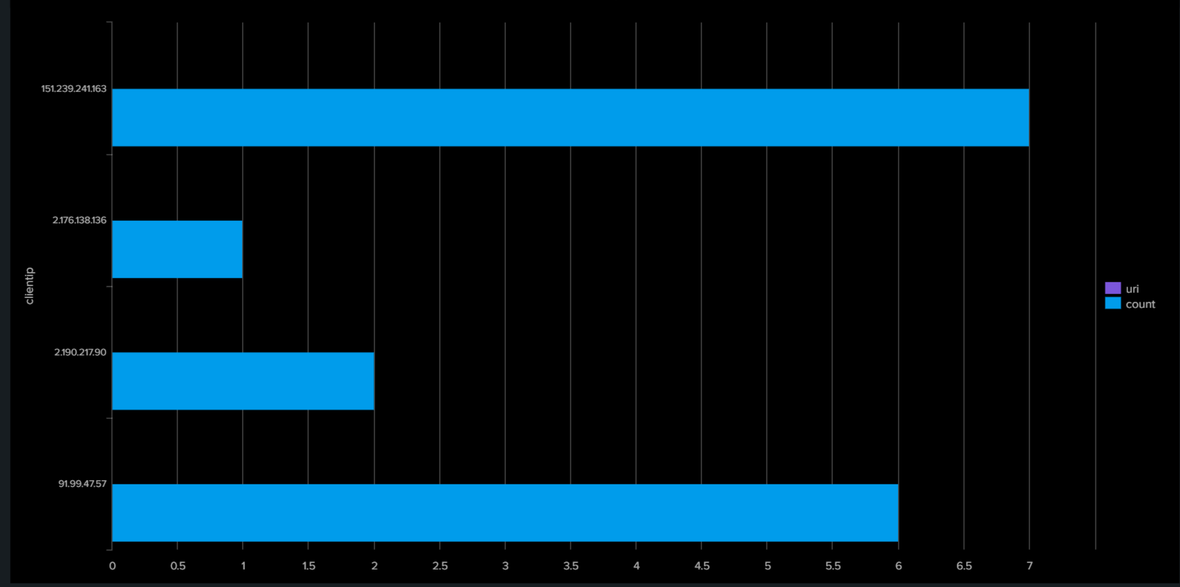
Top 10 Accessed URI Paths for IP 104.222.32.91 from Referer zanbil.ir/orderAdministration/console/188061

This timechart displays the count of requests per URI path over time for IP 104.222.32.91, specifically when the referer was https://www.zanbil.ir/orderAdministration/console/188061. 🔍 Key Insights: ✅ Frequent access to ...



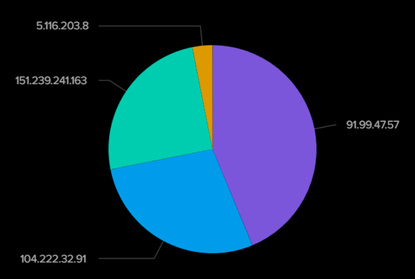
Suspicious Access Attempts to Admin/Login/Auth Endpoints

This visualization presents the count of requests made by different client IPs to sensitive endpoints such as: 🔐 /login (authentication attempts) 🔑 /auth (potential authorization requests) ⚠️ /admin (possible admin panel ...



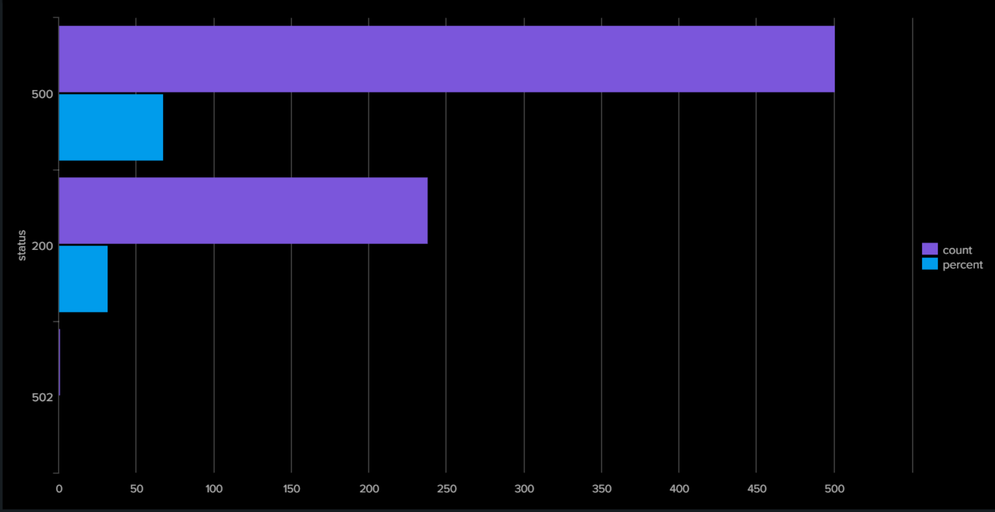
Top IPs Accessing /rapidGrails/jsonList Endpoint

This visualization displays the number of requests made by different client IPs to the /rapidGrails/jsonList endpoint. Th...



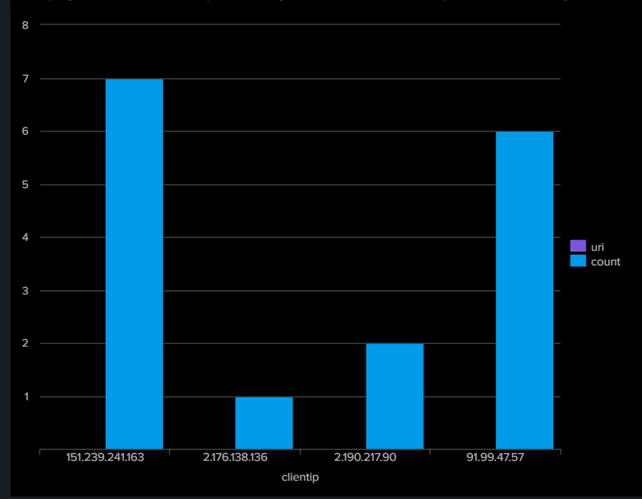
Top 20 HTTP Status Codes for IP 104.222.32.91 from Referer zanbil.ir/orderAdministration/console/188061

This visualization displays the top 20 HTTP status codes returned by the server for requests made by IP 104.222.32.91 when referred from https://www.zanbil.ir/orderAdministration/consol...



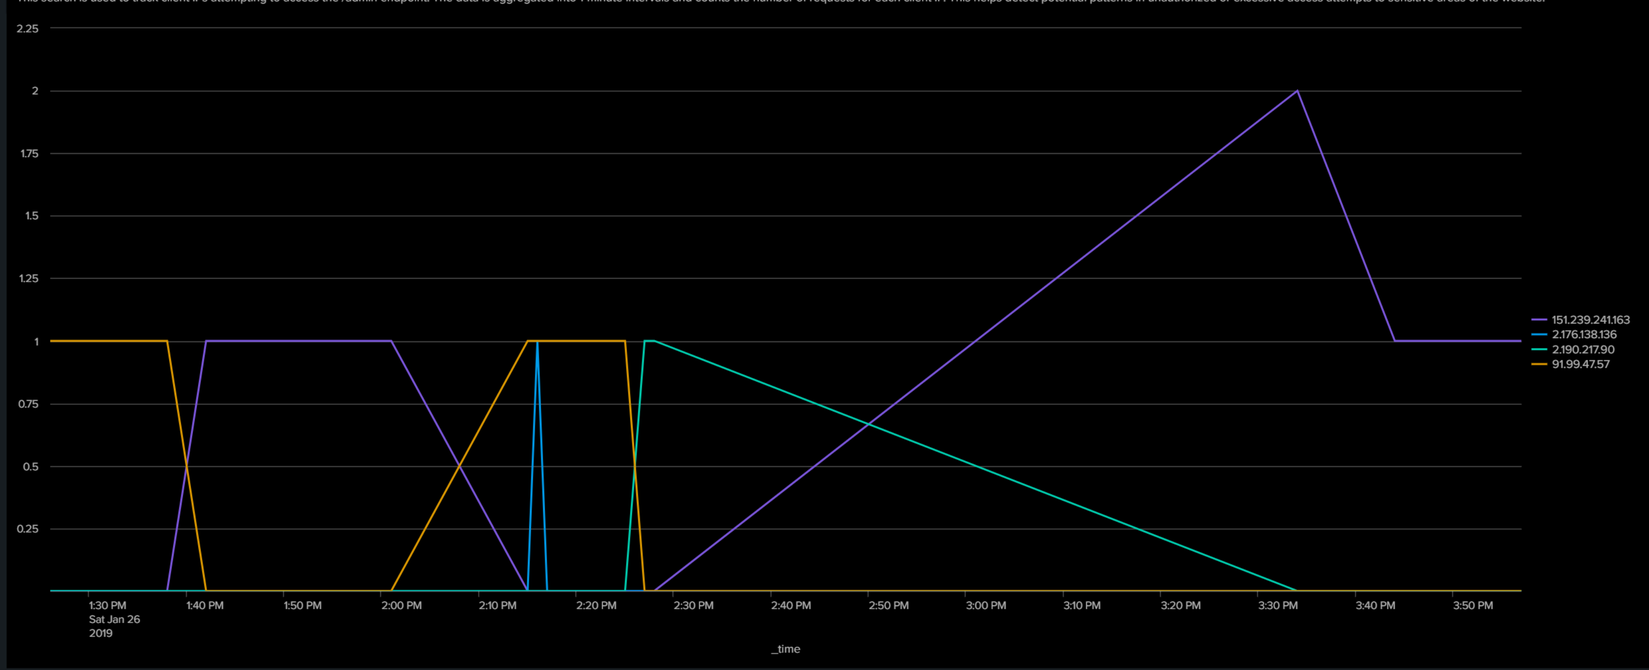
Access Attempts to Sensitive Endpoints (/admin, /login, /auth)

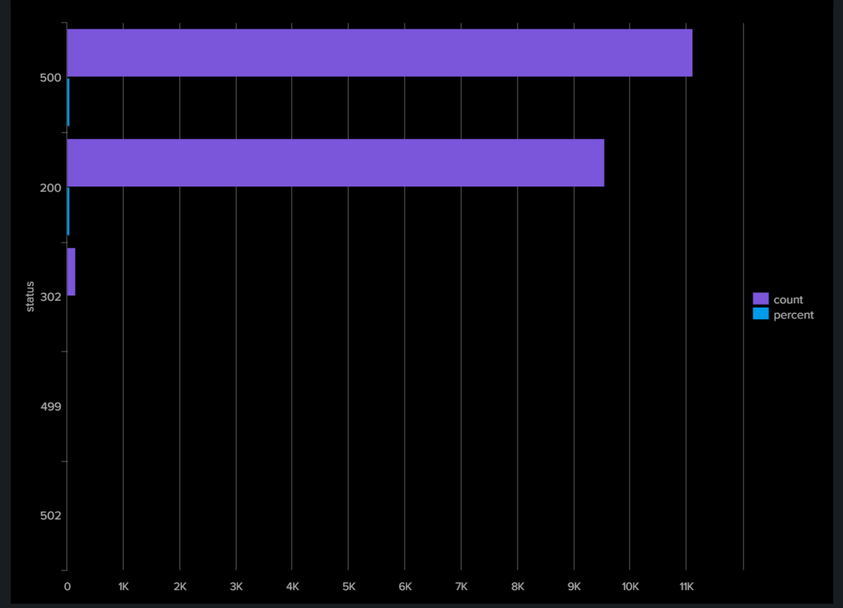
This query counts the number of requests made by each client IP to sensitive endpoints such as: /admin (potential a...



Access Attempts to /admin Endpoint (By Client IP)

This search is used to track client IPs attempting to access the /admin endpoint. The data is aggregated into 1-minute intervals and counts the number of requests for each client IP. This helps detect potential patterns in unauthorized or excessive access attempts to sensitive areas of the website.



Top 20 HTTP Status Codes for IP 104.222.32.91


This visualization displays the top 20 HTTP status codes returned by the server for requests made by IP 104.222.32.91. By analyzing the status codes, we...
